Part B for July 1930

SUBJECT

Model Bye-laws for enforcing the supply of information in cases of dangerous diseases in men and cattle

160) The Deputy Commrs of Dts
Presidents of the Bangalore & Mysore City Mnl Cls.
Director of Health
L 302-12 Dt 10-7-30
Directs the inclusion of enteric fever in Bye-laws

Dno 6009 L 2 6-30

Interim Report of Dr C V Natarajan on Fever and Dysentery

----- 0 -----

x x x x x x

The series of cases that were investigated were divided into 2 classes viz (1) Those that were clinically diagnosed as suffering from Enteric fevers or dysentery submitted either by the Government Hospital authorities or those submitted by the independent medical profession (2) Those cases where a survey was done of food handlers at the various refreshment rooms found in the various parts of the Bangalore City who willingly co-operated and of students who had been undergoing scout training and thus could be induced to be examined Unfortunately this work could not be carried out as intensively as was desired owing partly to the inertia of Hospital authorities who were satisfied if a diagnosis of enteric was made and the case recovered without mishap without finding the exact pathogenic organisms or to the unwillingness and the possibility of future restrictory measures that would be passed by the Municipal authorities on the part of hotel proprietors At present there exists no measure or law by means of which it would be possible to compel refractory food handlers to undergo periodic medical examination

G-O 2nd-L 4267-78 mdl 23 29-44 53205 L
Dy 9 12 29 comms model Bye Laws for enforcing sanitary & infor" in case of dangerous diseases

Third Member's Minute in G M Dy D 5750 (D 5181/L S G)

I would add " Entric Fever" specifically to the definition of dangerous diseases in these model bye-laws

Municipalities should I think, be specially written to to frame such bye-laws and enforce them and progress in the framing of the bye-laws has to be watched

---

Under Section 3 (15) of the Mdl Regs "Dangerous disease" has been defined as that means cholera plague, Small pox, and any endemic epidemic, or infectious disease by which the life of man is endangered. The diseases mentioned excluded in Bye laws approved in G O Dy 9 12 29 do not exclude Entric fever but the same many sometimes come under 'fever of over seven days duration, and may therefore be specifically mentioned in the Bye laws.
